I am a 52 year old female who lives on Social Security Disability. The possibility of a rate hike by SCE&G will hurt individuals could not come at a worst time. The economy is terrible. My income is limited and the bills continue to climb. There was no cost of living increase for individuals on Social Security last year and if it was it still would not be able to keep pace with the actual cost of living.

My total monthly income is \$747.00.

Could you pay all of your bill with this sum of money. There has to be another way for SCE&G to tighten its belt. I totally disagree with the rate hike.

Sincerely,
